What's New in the Third Edition

This award winning interactive DVD-ROM has been completely rebuilt to high resolution (1024 x 768 pixel) graphics with new full color photographs and illustrations. Botanical descriptions, distribution maps, habitats, and over 2400 photographs of 447 weeds and crops common to the continental United States, Canada, and Alaska are included. New features include 85 additional weed species, revised distribution maps that include Canada and Alaska, an expanded illustrated glossary of 565 botanical terms, and updated common and scientific names. The unique interactive visual identification key now covers all weeds in the program. This program is an outstanding resource for agriculturalists, horticulturalists, gardeners, herbalists, and all types of courses in the agricultural and biological sciences at the high school and collegiate level.

The DVD-ROM requires Windows 98 2nd ed./Me/2000 with SP3 or higher/XP, a 500 mhz processor (1 Ghz recommended), at least 128 Mb of RAM, a DVD-ROM drive, sound card, and an XGA video adapter (1024 x 768 pixel resolution or higher) capable of producing 64,000 - 16 bit color (24-bit or greater, 16 million colors recommended).

Sample Entry: Jimsonweed (Species Screen)

additional illustrations

hot link to complete family description

full botanical description of species characteristics

geographical distribution map for U.S. and Canada

4-9 photos of each growth stage for each species

historical uses and features of species

Illustrated glossary of botanical terms

Primary weed habitats

The screenshot shows a user interface for the Jimsonweed species screen. It includes a large photograph of the plant, a detailed botanical description, a distribution map of the United States and Canada, a list of growth stages with corresponding photos, and a glossary of botanical terms. Callouts from the surrounding text point to these specific elements on the screen.
